

REACH is an acronym for Registration, Evaluation, Authorisation and restriction of Chemicals. It came into force on 1st June 2007 and replaced a number of European Directives and Regulations with a single system.

REACH applies to substances manufactured or imported into the EU in quantities of 1 tonne or more per year. Generally, it applies to all individual chemical substances on their own, in preparations or in articles (if the substance is intended to be released during normal and reasonably foreseeable conditions of use from an article).

Central Cables are importers and distributors of products that qualify as articles in the REACH regulations; we are therefore not required to register these products.

As the products we supply under normal conditions are not intended to release substances we are not required to submit a registration for the chemical substances contained in these articles.

However, we will advise you if any of our products do contain concentrations greater than 0.1% of any substances listed on the published candidate list as per article 33 of the regulations.

EU REACH REGULATION UPDATE: The number of Substances of Very High Concern (SVCH) listed on the candidate list for REACH authorisation and restriction numbers 168 as of 17th December 2015.

We will continue to monitor our supply chain to ensure that all products supplied by Central Cables are fully compliant to the REACH regulations.

More information regarding REACH is available on the European Chemicals Agency (ECHA) website: www.echa.europa.eu
